Periodicities in Nonlinear Difference Equations (Advances in Discrete Mathematics and Applications)

E.A. Grove, G. Ladas

Sharkovsky's Theorem, Li and Yorke's "period three implies chaos" result, and the $(3x+1)$ conjecture are beautiful and deep results that demonstrate the rich periodic character of first-order, nonlinear difference equations. To date, however, we still know surprisingly little about higher-order nonlinear difference equations.

During the last ten years, the authors of this book have been fascinated with discovering periodicities in equations of higher order which for certain values of their parameters have one of the following characteristics:

1. Every solution of the equation is periodic with the same period.
2. Every solution of the equation is eventually periodic with a prescribed period.
3. Every solution of the equation converges to a periodic solution with the same period.

This monograph presents their findings along with some thought-provoking questions and many open problems and conjectures worthy of investigation. The authors also propose investigation of the global character of solutions of these equations for other values of their parameters and working toward a more complete picture of the global behavior of their solutions.

With the results and discussions it presents, *Periodicities in Nonlinear Difference Equations* places a few more stones in the foundation of the basic theory of nonlinear difference equations. Researchers and graduate students working in difference equations and discrete dynamical systems will find much to intrigue them and inspire further work in this area.

From reader reviews:

Jessica Jackson:

In other case, little persons like to read book Periodicities in Nonlinear Difference Equations (Advances in Discrete Mathematics and Applications). You can choose the best book if you love reading a book. Given that we know about how is important the book Periodicities in Nonlinear Difference Equations (Advances in Discrete Mathematics and Applications). You can add information and of course you can around the world by a book. Absolutely right, due to the fact from book you can understand everything! From your country till foreign or abroad you may be known. About simple matter until wonderful thing you could know that. In this era, we can open a book or even searching by internet gadget. It is called e-book. You can utilize it when you feel uninterested to go to the library. Let's read.

Evan Miller:

Now a day people who Living in the era where everything reachable by connect with the internet and the resources inside it can be true or not demand people to be aware of each info they get. How a lot more to be smart in obtaining any information nowadays? Of course the correct answer is reading a book. Reading through a book can help persons out of this uncertainty Information particularly this Periodicities in Nonlinear Difference Equations (Advances in Discrete Mathematics and Applications) book as this book offers you rich data and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it you probably know this.

Ellen Scherer:

Many people spending their moment by playing outside together with friends, fun activity with family or just watching TV the entire day. You can have new activity to invest your whole day by studying a book. Ugh, do you think reading a book can really hard because you have to use the book everywhere? It all right you can have the e-book, bringing everywhere you want in your Cell phone. Like Periodicities in Nonlinear Difference Equations (Advances in Discrete Mathematics and Applications) which is obtaining the e-book version. So , try out this book? Let's see.

Antonio Mock:

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you may have it in e-book way, more simple and reachable. This specific Periodicities in Nonlinear Difference Equations (Advances in Discrete Mathematics and Applications) can give you a lot of pals because by you checking out this one book you have factor that they don't and make anyone more like an interesting person. That book can be one of a step for you to get success. This e-book offer you information that perhaps your friend doesn't understand, by knowing more than some other make you to be great persons. So , why hesitate? We need to have Periodicities in Nonlinear Difference Equations (Advances in Discrete Mathematics and Applications).
