Within these pages you will find a concise manual focused squarely on the rationale and practicality of creating architectural projects within the BIM paradigm. The emphasis is on proven best-practice procedures rather than a series of independent commands and tools. The goal of each lesson is to help readers complete building design projects successfully. You will find equal emphasis on "why" individual tools and features are used, not just "how" to performs the picks and clicks. The text and exercises seek to give the reader a clear sense of the value of the tools, while remaining focused on practical examples from architectural practice.
