## **Collapse of the Soviet Military** Gen. William E. Odom, William E. Odom

In this text, a United States Army officer and scholar traces the rise and fall of the Soviet military, arguing that it had a far greater impact on Soviet politics and economic development than was perceived in the West. The author asserts that Gorbachev saw that shrinking the military and the military-industrial sector of the economy was essential for fully implementing perestroika and that his efforts to do this led to the dissolution of the Soviet Union. Odom enhances his account with interviews with key factors in the Soviet Union before, during and after the collapse. He describes the condition of the Soviet military during the mid-1980s and explains how it became what it was - its organizational structures, manpower policies, and military-industrial arrangements. He then moves to the events that led to its destruction, taking us to the most secret circles of Soviet policy making, as well as describing the public debates, factional struggles in the new parliament, and street combat as army units tried to repress the political forces unleashed by glasnost.
