Using Event-B for Critical Device Software Systems

Neeraj Kumar Singh

Using Event-B for Critical Device Software Systems Neeraj Kumar Singh

Defining a new development life-cycle methodology, together with a set of associated techniques and tools to develop highly critical systems using formal techniques, this book adopts a rigorous safety assessment approach explored via several layers (from requirements analysis to automatic source code generation).

This is assessed and evaluated via a standard case study: the cardiac pacemaker. Additionally a formalisation of an Electrocardiogram (ECG) is used to identify anomalies in order to improve existing medical protocols. This allows the key issue - that formal methods are not currently integrated into established critical systems development processes - to be discussed in a highly effective and informative way.

Using Event-B for Critical Device Software Systems serves as a valuable resource for researchers and students of formal methods. The assessment of critical systems development is applicable to all industries, but engineers and physicians from the health domain will find the cardiac pacemaker case study of particular value.

From reader reviews:

Agnes Henson:

What do you ponder on book? It is just for students since they are still students or the item for all people in the world, the actual best subject for that? Just you can be answered for that problem above. Every person has distinct personality and hobby for each and every other. Don't to be obligated someone or something that they don't wish do that. You must know how great and also important the book Using Event-B for Critical Device Software Systems. All type of book are you able to see on many options. You can look for the internet resources or other social media.

Larry Carvajal:

Reading a book tends to be new life style within this era globalization. With reading you can get a lot of information which will give you benefit in your life. Along with book everyone in this world can share their idea. Guides can also inspire a lot of people. A great deal of author can inspire their particular reader with their story or maybe their experience. Not only situation that share in the books. But also they write about the ability about something that you need instance. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors on this planet always try to improve their proficiency in writing, they also doing some investigation before they write with their book. One of them is this Using Event-B for Critical Device Software Systems.

Marie Clayton:

The publication with title Using Event-B for Critical Device Software Systems includes a lot of information that you can study it. You can get a lot of profit after read this book. This kind of book exist new knowledge the information that exist in this e-book represented the condition of the world currently. That is important to you to find out how the improvement of the world. This specific book will bring you with new era of the globalization. You can read the e-book on your smart phone, so you can read the idea anywhere you want.

Sharon Lopez:

A lot of people always spent their particular free time to vacation as well as go to the outside with them friends and family or their friend. Are you aware? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. If you want to try to find a new activity that's look different you can read the book. It is really fun for yourself. If you enjoy the book that you simply read you can spent all day every day to reading a publication. The book Using Event-B for Critical Device Software Systems it is extremely good to read. There are a lot of individuals who recommended this book. They were enjoying reading this book. When you did not have enough space to develop this book you can buy the particular e-book. You can more easily to read this book from your smart phone. The price is not very costly but this book possesses high quality.
