ACH15® Discovery: Unconventional FOREX Transactions 100% WON: (volumes 1 + 2 + 3) Florin Iacob

Outstanding and simultaneous characteristics of an ACH15® Unconventional FOREX Super Strategy (Super Portfolio): 1. It doesn't have a cycle (the initial invested capital is a deposit that continuously produces, a golden eggs chicken), so the risk presented at the unbalancing of the portfolio in the variant from volume 1 of the book has disappeared; 2. It has positive swap or zero or lightly negative (per total portfolio); 3. It is insured against the movements of the market and against of the next historical maximums (advanced hedging); 4. It has MHD (Maximum Historical Discrepancy) small per cell and per portfolio (10 times less than in the case of the strategy variant from volume 1); 5. It has good arbitrage (it is a gain no matter where the market goes, in those 3 situations: increasing market, decreasing market, range market); 6. It has minimum 50% per year as guaranteed efficiency (and as average of the annual efficiency it has 90-120% depending by the volatility of the respective year); 7. It is 100% safe (in any moment of the portfolio; here it has been eliminated the unbalancing of the portfolio presented in the volume 1); 8. It can permanently run and has flexibility (it can be modified, combined, diversified, reduced, extended, like Lego game and like modeling clay); 9. Each cell is INDEPENDENT by the rest of the cells and by the portfolio in general; 10. Money can be withdrawn once at 3 months like quarterly dividends (for 4 times per year); 11. It can be formed a permanent grid (after the closing of a triple cell it is waiting for entering again in the market according to the grid); 12. It has the possibility for diversification with many types of triple cells which differ between each other by chosen currencies (if we want that). All of these features transform the ACH15® Unconventional Advanced Strategy into a Super Strategy.
