Mathematics for Economics (MIT Press) Michael Hoy, John Livernois, Chris McKenna, Ray Rees, Thanasis Stengos

This text offers a comprehensive presentation of the mathematics required to tackle problems in economic analyses. To give a better understanding of the mathematical concepts, the text follows the logic of the development of mathematics rather than that of an economics course. The only prerequisite is high school algebra, but the book goes on to cover all the mathematics needed for undergraduate economics. It is also a useful reference for graduate students. After a review of the fundamentals of sets, numbers, and functions, the book covers limits and continuity, the calculus of functions of one variable, linear algebra, multivariate calculus, and dynamics. To develop the student's problem-solving skills, the book works through a large number of examples and economic applications. This streamlined third edition offers an array of new and updated examples. Additionally, lengthier proofs and examples are provided on the book's website. The book and the web material are cross-referenced in the text. A student solutions manual is available, and instructors can access online instructor's material that includes solutions and PowerPoint slides. Visit http://mitpress.mit.edu/math_econ3 for complete details.

From reader reviews:

Christopher Milbrandt:

Do you have favorite book? Should you have, what is your favorite's book? Reserve is very important thing for us to know everything in the world. Each reserve has different aim or perhaps goal; it means that publication has different type. Some people really feel enjoy to spend their the perfect time to read a book. They are reading whatever they consider because their hobby is definitely reading a book. Think about the person who don't like looking at a book? Sometime, man or woman feel need book when they found difficult problem as well as exercise. Well, probably you will need this Mathematics for Economics (MIT Press).

Luke Shaffer:

Now a day people who Living in the era wherever everything reachable by talk with the internet and the resources inside can be true or not need people to be aware of each facts they get. How a lot more to be smart in receiving any information nowadays? Of course the answer is reading a book. Reading through a book can help individuals out of this uncertainty Information specifically this Mathematics for Economics (MIT Press) book as this book offers you rich data and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it you may already know.

Lela Hird:

People live in this new day of lifestyle always try to and must have the extra time or they will get wide range of stress from both everyday life and work. So , whenever we ask do people have time, we will say absolutely indeed. People is human not only a robot. Then we inquire again, what kind of activity do you possess when the spare time coming to you actually of course your answer will certainly unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative in spending your spare time, the actual book you have read is definitely Mathematics for Economics (MIT Press).

Evelyn Roberts:

Many people spending their time by playing outside along with friends, fun activity having family or just watching TV the entire day. You can have new activity to spend your whole day by examining a book. Ugh, think reading a book will surely hard because you have to accept the book everywhere? It ok you can have the e-book, having everywhere you want in your Cell phone. Like Mathematics for Economics (MIT Press) which is having the e-book version. So , try out this book? Let's see.
