Green Chemistry and Engineering: A Pathway to Sustainability

Anne E. Marteel-Parrish, Martin A. Abraham

Green Chemistry and Engineering: A Pathway to Sustainability Anne E. Marteel-Parrish, Martin A. Abraham

Promotes a green approach to chemistry and chemical engineering for a sustainable planet

With this text as their guide, students will gain a new outlook on chemistry and engineering. The text fully covers introductory concepts in general, organic, inorganic, and analytical chemistry as well as biochemistry. At the same time, it integrates such concepts as greenhouse gas potential, alternative and renewable energy, solvent selection and recovery, and ecotoxicity. As a result, students learn how to design chemical products and processes that are sustainable and environmentally friendly.

Green Chemistry and Engineering presents the green approach as an essential tool for tackling problems in chemistry. A novel feature of the text is its integration of introductory engineering concepts, making it easier for students to move from fundamental science to applications.

Throughout this text, the authors integrate several features to help students understand and apply basic concepts in general chemistry as well as green chemistry, including:

- Comparisons of the environmental impact of traditional chemistry approaches with green chemistry approaches
- Analyses of chemical processes in the context of life-cycle principles, demonstrating how chemistry fits within the complex supply chain
- Applications of green chemistry that are relevant to students' lives and professional aspirations
- Examples of successful green chemistry endeavors, including Presidential Green Chemistry Challenge winners
- Case studies that encourage students to use their critical thinking skills to devise green chemistry solutions

Upon completing this text, students will come to understand that chemistry is not antithetical to sustainability, but rather, with the application of green principles, chemistry is the means to a sustainable planet.

From reader reviews:

Shawn Macdonald:

Do you certainly one of people who can't read satisfying if the sentence chained within the straightway, hold on guys that aren't like that. This Green Chemistry and Engineering: A Pathway to Sustainability book is readable by you who hate the straight word style. You will find the facts here are arrange for enjoyable reading through experience without leaving even decrease the knowledge that want to deliver to you. The writer of Green Chemistry and Engineering: A Pathway to Sustainability content conveys thinking easily to understand by many people. The printed and e-book are not different in the content material but it just different available as it. So , do you nonetheless thinking Green Chemistry and Engineering: A Pathway to Sustainability is not loveable to be your top collection reading book?

Leslie Hackett:

Hey guys, do you really wants to finds a new book to learn? May be the book with the name Green Chemistry and Engineering: A Pathway to Sustainability suitable to you? The actual book was written by well-known writer in this era. Often the book untitled Green Chemistry and Engineering: A Pathway to Sustainability is the main one of several books in which everyone read now. This specific book was inspired a number of people in the world. When you read this guide you will enter the new dimensions that you ever know just before. The author explained their idea in the simple way, therefore all of people can easily to recognise the core of this e-book. This book will give you a lot of information about this world now. So you can see the represented of the world with this book.

David Bruce:

Spent a free time to be fun activity to do! A lot of people spent their down time with their family, or their particular friends. Usually they carrying out activity like watching television, going to beach, or picnic in the park. They actually doing same task every week. Do you feel it? Will you something different to fill your current free time/ holiday? Could be reading a book might be option to fill your no cost time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to test look for book, may be the e-book untitled Green Chemistry and Engineering: A Pathway to Sustainability can be great book to read. May be it can be best activity to you.

Phillip Darrah:

With this era which is the greater particular person or who has ability to do something more are more important than other. Do you want to become one among it? It is just simple solution to have that. What you have to do is just spending your time almost no but quite enough to enjoy a look at some books. One of many books in the top record in your reading list is usually Green Chemistry and Engineering: A Pathway to Sustainability. This book and that is qualified as The Hungry Slopes can get you closer in turning into precious person. By looking upward and review this guide you can get many advantages.
