Todd Robinson, AIA, explore the current and emerging trends in medical care, technology, and delivery as practiced in a rich cross section of examples of healthcare facilities from around the country. In this new edition they touch on such topics as Lean and LEED practices, evidence-based design, Planetree design, and other important issues facing contemporary and future designers. They expand coverage of the increasingly important topics covered in previous editions, such as women's and children's healthcare and care for the elderly. In short, the authors take a fresh look at the latest advances in the field and explain how these advances are affecting the design of hospitals and other healthcare facilities and the resulting impact for the future. 250 full-color and 25 black-and-white illustrations
