Probability Problems and Solutions

Stefan Hollos, J. Richard Hollos

Probability Problems and Solutions Stefan Hollos, J. Richard Hollos

This book will help you learn probability in the most effective way possible - through problem solving. It contains over 200 problems in discrete probability with detailed solutions for each. Most of the problems require very little mathematical background to solve. A good grasp of algebra is all that is required. Some prior exposure to probability or combinatorics will make things easier but the book has enough introductory material to cover any deficiency in those areas. There are sections that review the basics of discrete probability and combinatorics. There are also sections on advance topics in discrete probability that are helpful in solving the more difficult and interesting problems. The problems range widely in difficulty and variety. They begin very easy and increase in difficulty as you go. The first few are warm up problems to wake up your probability neurons and get you ready for what's to come. Some of the later problems can be quite challenging and may take some effort to solve. There are problems on letters and words, dice and coin problems, card problems, sports problems, Bayesian problems, collection problems, birthday problems and many many more. The almost endless variety of probability problems is one of the things that makes them so stimulating and fun to solve.

From reader reviews:

Dorinda Kling:

This Probability Problems and Solutions usually are reliable for you who want to be described as a successful person, why. The key reason why of this Probability Problems and Solutions can be one of many great books you must have is giving you more than just simple reading through food but feed you with information that possibly will shock your previous knowledge. This book is handy, you can bring it almost everywhere and whenever your conditions both in e-book and printed versions. Beside that this Probability Problems and Solutions giving you an enormous of experience like rich vocabulary, giving you trial of critical thinking that we know it useful in your day task. So , let's have it appreciate reading.

Richard Ortega:

A lot of people always spent their very own free time to vacation as well as go to the outside with them family members or their friend. Are you aware? Many a lot of people spent they will free time just watching TV, or perhaps playing video games all day long. In order to try to find a new activity that is look different you can read a new book. It is really fun in your case. If you enjoy the book which you read you can spent 24 hours a day to reading a e-book. The book Probability Problems and Solutions it is quite good to read. There are a lot of people that recommended this book. They were enjoying reading this book. In the event you did not have enough space bringing this book you can buy typically the e-book. You can m0ore easily to read this book from a smart phone. The price is not too expensive but this book has high quality.

Vicki Harris:

That e-book can make you to feel relax. That book Probability Problems and Solutions was vibrant and of course has pictures on there. As we know that book Probability Problems and Solutions has many kinds or style. Start from kids until teens. For example Naruto or Investigator Conan you can read and think you are the character on there. So , not at all of book usually are make you bored, any it can make you feel happy, fun and relax. Try to choose the best book for you and try to like reading that.

Edward Franco:

What is your hobby? Have you heard which question when you got learners? We believe that that issue was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And also you know that little person such as reading or as reading become their hobby. You need to know that reading is very important in addition to book as to be the thing. Book is important thing to incorporate you knowledge, except your current teacher or lecturer. You see good news or update regarding something by book. Many kinds of books that can you decide to try be your object. One of them is this Probability Problems and Solutions.
