Understanding Political Science Statistics and Understanding PS Stats using STATA (bundle): Understanding Political Science Statistics using Stata: A Manual with Exercises (500 Tips) Ellen Seljan, Peter Galderisi

This manual walks students through the procedures for analysis in Stata and provides exercises that go hand-in-hand with online data sets. The manual complements the textbook *Understanding Political Science Statistics: Observations and Expectations in Political Analysis*, by Peter Galderisi, making it easy to use alongside the book in a course or as a stand-alone guide to using Stata. Seljan demonstrates how to run commands in Stata for different kinds of research questions and shows the results of the analyses, using lots of annotated screenshots from Stata version 12 (but compatible with all versions, including Stata Small). Students will be guided through standard processes replete with examples and exercises to ready them for future work in political science research.

The diverse group of data sets provided include subsamples of both the 2008 and 2012 American National Election Studies, a Eurobarometer survey, single year and longitudinal congressional district files, the 2012 Comparative Congressional Election Study, and a comparative, crossnational country file. Versions with reduced case numbers and variables are also included that are compatible with Stata Small.

This manual (and a parallel SPSS manual) are available as stand-alone products or packaged with the textbook *Understanding Political Science Statistics*.
