Biological Networks (Complex Systems and Interdisciplinary Science)

Frantois Kopos

Biological Networks (Complex Systems and Interdisciplinary Science) Frantois Kopos This volume presents a timely and comprehensive overview of biological networks at all organization levels in the spirit of the complex systems approach. It discusses the transversal issues and fundamental principles as well as the overall structure, dynamics, and modeling of a wide array of biological networks at the molecular, cellular, and population levels. Anchored in both empirical data and a strong theoretical background, the book therefore lends valuable credence to the complex systems approach.

Contents: Scale-Free Networks in Biology (E Almaas et al.); Modularity in Biological Networks (R V Solé et al.); Inference of Biological Regulatory Networks: Machine Learning Approaches (F d Alché-Buc); Transcriptional Networks (F Képès); Protein Interaction Networks (K Tan & T Ideker); Metabolic Networks (D A Fell); Heterogeneous Molecular Networks (V Schächter); Evolution of Regulatory Networks (A Veron et al.); Complexity in Neuronal Networks (Y Frégnac et al.); Networks of the Immune System (R E Callard & J Stark); A History of the Study of Ecological Networks (L-F Bersier); Dynamic Network Models of Ecological Diversity, Complexity, and Nonlinear Persistence (R J Williams & N D Martinez); Infection Transmission through Networks (J S Koopman).

From reader reviews:

Thomas Rinaldi:

A lot of people always spent their very own free time to vacation or go to the outside with them friends and family or their friend. Are you aware? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. If you need to try to find a new activity this is look different you can read a new book. It is really fun for you. If you enjoy the book that you simply read you can spent the whole day to reading a e-book. The book Biological Networks (Complex Systems and Interdisciplinary Science) it is very good to read. There are a lot of people that recommended this book. These folks were enjoying reading this book. When you did not have enough space to bring this book you can buy the actual e-book. You can m0ore easily to read this book from a smart phone. The price is not to cover but this book features high quality.

Carol Reck:

Precisely why? Because this Biological Networks (Complex Systems and Interdisciplinary Science) is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will zap you with the secret this inside. Reading this book adjacent to it was fantastic author who else write the book in such wonderful way makes the content interior easier to understand, entertaining way but still convey the meaning completely. So , it is good for you for not hesitating having this any more or you going to regret it. This book will give you a lot of rewards than the other book get such as help improving your proficiency and your critical thinking approach. So , still want to hold off having that book? If I ended up you I will go to the reserve store hurriedly.

Daryl Glover:

Your reading 6th sense will not betray an individual, why because this Biological Networks (Complex Systems and Interdisciplinary Science) reserve written by well-known writer whose to say well how to make book that may be understand by anyone who also read the book. Written in good manner for you, dripping every ideas and publishing skill only for eliminate your own hunger then you still skepticism Biological Networks (Complex Systems and Interdisciplinary Science) as good book not simply by the cover but also with the content. This is one e-book that can break don't ascertain book by its include, so do you still needing yet another sixth sense to pick this specific!? Oh come on your reading sixth sense already said so why you have to listening to yet another sixth sense.

Jack Nguyen:

What is your hobby? Have you heard in which question when you got pupils? We believe that that query was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person similar to reading or as examining become their hobby. You should know that reading is very important and book as to be the issue. Book is important thing to incorporate you knowledge, except

your own personal teacher or lecturer. You discover good news or update in relation to something by book. A substantial number of sorts of books that can you go onto be your object. One of them is actually Biological Networks (Complex Systems and Interdisciplinary Science).
