From Signals to Colours: A Case-based Atlas of Electroanatomic Mapping in Complex Atrial arrhythmias Roberto De Ponti

In this lavishly illustrated atlas, a selection of very difficult cases of arrhythmias is presented, in which correct diagnosis and successful ablation have been guided by the integration of conventional intracavitary signals and electroanatomic mapping. In each case a short introduction, procedure details and outcome, and a brief commentary are given. Throughout, the crucial role of electroanatomic mapping in providing new insights in a field still in evolution is very evident.
